APPLICATION RECOMMENDATIONS

Pro Directions • Handling & Storage

SHAKE WELL! *The mixed product should be agitated prior to and during application.*

Lawns: Apply Bio Green® ProTurf Nutrition™ at a maximum rate of 5 gallons per acre. Dilute with enough water to cover 1 acre. Do not apply at less than a 7:1 dilution. Apply to all turf types at an interval of 4-8 wks. Recommended annual rate of 6-12 lbs. N per acre.

Greens & Tees: Apply at a rate of 1 gallon per acre weekly or 2 gallons every two weeks.

Store in a cool dry place away from sunlight. Product will store for 2 years in normal warehouse conditions.

Apply in accordance with best management practices (BMP's) established by your Cooperative Extension Service. Observe any State or Local fertilizer application regulations.

Caution: This product contains the secondary micronutrient iron. Iron may stain concrete, wood and other pervious and impervious surfaces. **Apply** only to turf, plants, and soil. If plants are flowering, apply to base of the plant to avoid staining of blooms.

Keep out of reach of children. If product comes in contact with skin or eyes flush with water immediately.

PRODUCT DESCRIPTION

Bio Green® ProTurf Nutrition™ 5-0-1 is engineered to be a complete fertilizer for all varieties of turf grass and certain plant, shrub, and tree situations. Bio Green® 5-0-1 is formulated to provide good consistent color during periods when the soil is the most active; it will significantly increase root mass and depth therefore drought resistance. It will stimulate soil microbial activity thus improving soil fertility. On cool season turf, it provides a margin of safety on non-irrigated lawns during periods of drought stress. On warm season turf, it is safe for feeding applications during warmer months or for lawns where there is clearly a need for soil re-mediation. Bio Green® 5-0-1 can also be used for soil (non-foliar) applications on trees and shrubs.

Our mission is to provide our licensed spray service providers with a high quality bio-nutrient fertilizer that is highly beneficial, safe, simple to apply, cost effective, and compatible with other products. Bio Green® products have proven to be effective stand-alone, nutrient fertilizers, on turf and ornamentals, in areas where fertilization regulations have been implemented, as well as a high quality supplement to existing fertility programs.

Our patent pending Bio Green® ProTurf Nutrition™ eliminates the need for mixing several different products by combining high quality non-plant ingredients such as Kelp, Humic Acid, Fulvic Acid, and Amino Acids, with traditional plant nutrients such as Urea Nitrogen, Potassium, Iron, and Sulfur.

Always read and follow label directions.
